-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-17 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 18 November 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The following action is in response to the amendment received November 18, 2005.

Drawings

The replacement sheets of drawings were received on November 18, 2005. These drawings are acceptable. Accordingly, the objection to the drawings set forth in the previous Office action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3, 4, and 7-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Usoro('901). Usoro discloses a clutch comprising a clutch housing 12, a piston 28, and a sleeve 18 having a predetermined shape that conforms to the housing. The sleeve is positioned within the clutch housing and forms a fluid passageway 48,26 between the clutch housing 12 and the sleeve 18 and forms a piston reactive cavity between the clutch housing 12, the piston 28, and the sleeve 18. The sleeve, as seen

in Fig. 1 of Usoro, has a portion that can be considered a first portion and two stepped portions readable as first and second stepped portions. The sleeve further includes a passage 50 which can be considered a fluid entry passage for the entry of fluid into balance chamber 46. Fluid travels through the entry passage and also travels through the fluid passageway and into the piston reactive cavity. The sleeve in Usoro has a surface for sealing engagement with the piston, as seen in Fig. 1. The Usoro device has a centrifugal compensation device 42, and the sleeve has a centrifugal retaining device 68 to retain the centrifugal compensation device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2 and 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Usoro('901). In Usoro, the housing 16 is shown mounted on sleeve 18. Since relative rotation is not permitted between the piston and the sleeve, it would have been obvious to one having ordinary skill in this art to mount the housing on the sleeve by an interference fit, the motivation being to firmly mount the housing for rotation with the sleeve. Regarding the method claims, it is submitted that the claimed steps of providing a housing, attaching a piston, providing a sleeve, positioning the sleeve, creating fluid passageways, and providing sealing surfaces would inherently be performed in making the device of Usoro.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Usoro('901) in view of Leichter et al.('649). This claim calls for the use of "powered" metal for the sleeve. Leichter et al. disclose the use of powered metal as suitable for use in a coupling. It would have been obvious to use this material in the Usoro device, the motivation being to form sliding sealing surfaces, as taught by Leichter et al.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Usoro('901) in view of Slesar et al.('193). These claims call the use of sintered iron for the sleeve. Usoro does not disclose a specific material for sleeve 18. Slesar et al. disclose the use of sintered iron for use in sleeves. It would have been obvious to use

sintered iron for the sleeve 18 of Uoro, the motivation being to use a material taught as suitable for this environment.

Response to Arguments

As noted above, the objection to the drawings has been overcome by the replacement drawings filed November 18, 2005, and the objection is withdrawn.

Applicants' arguments filed November 18, 2005 with respect to the claim rejections have been fully considered but they are not persuasive. Applicants assert that Uoro('901) does not disclose a sleeve. The examiner disagrees. Element 18 can be read as a sleeve. The sleeve of Uoro conforms to the shape of the housing at least at the point where they connect. The sleeve is positioned within the housing and forms a fluid passageway at 48 between the housing and the sleeve. A piston reactive cavity is formed between the housing, sleeve and piston. Thus the claim is broad enough to read on the structure of Uoro and the rejections of the claims are still believed to be proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

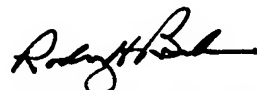

Art Unit: 3681

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney H. Bonck whose telephone number is (571) 272-7089. The examiner can normally be reached on Monday-Friday 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
